

## INTRODUCTION

### 1.1 Overview

I have created a E-commerce website. It is same as any other shopping sites. I have created a site in Godaddy platform . I used astra theme and astra plugin in my site . I have installed brand store through elementor further , i added stores by going into products ,add new. Then I changed currency from dollars to indian rupee.

### 1.2 Purpose

As it is online shopping site we can order any item at any time . It has been proven more beneficial in pandemic times. So online shopping much in demand these days. As it contact less delivery. It is beneficial for customers and retailers.

## 2. LITERATURE SURVEY

### 2.1 Existing Problem

Existing approaches or method to solve this problem?

Existing approaches or method to solve this problem

There is no such problem but we can develop it by delivering through drone.

### 2.2 Proposed solution

What is the method or solution suggested by you?

We can develop it by delivering through drone.

## 3 THEORETICAL ANALYSIS

### 3.1 Block diagram

Diagrammatic overview of the project

Installing Wordpress----->Created Godaddy account----->installed plugins and themes----->installed elementor and brand store----->products----->add new----->selected image----->uploaded

### 3.2 Hardware/Software designing

I have used only software requirements like astra theme ,elementor,brand store.

## 4. RESULT

Can open the site and add the cart and the currency is in rupees.

## 5. ADVANTAGES AND DISADVANTAGES

a) We can visit the site at any time

### DISADVANTAGES

a) Delivery may take time

b) Can't experience actual shopping

## 6. APPLICATION

Grocery shopping

clothes

Household items

## FUTURE SCOPE

We can deliver contact less delivery by assigning drones to deliver products
